

AccuFund provides a full set of features for government and non-profit clients in its Core system. Our belief is that every organization will need this functionality and we provide it all as part of our Core system. Every client gets these items when they buy the AccuFund Accounting Suite. If you are looking at other products, compare carefully and make sure all of these features are included in the cost estimate (If they even have these same features!). Even if you are not using them today, there is a good chance you will require them tomorrow.

AccuFund's Core system includes all of the following:

Functionality	AccuFund	Other Products
General Ledger	included	?
Fund accounting solution	included	?
User Definable Financial Reporting	included	?
Basic allocations	included	?
Automatic report distribution by email	included	?
Report Scheduler	included	?
Accounts Payable	included	?
Cash Receipts	included	?
Encumbrance Accounting	included	?
Imports directly from Excel or Text files	included	?
Accept credit card payments	included	?
Export to Excel from every module	included	?
EFT Payment in AP	included	?
Payroll Direct Deposit	included	?
Bank positive pay notification	included	?
Multiple budget versions for each fiscal year, grant and project versions	included	?
Bank Reconciliation	included	?
Forms Designer	included	?

Reports Designer	included	?
Quick Reports without needing a designer	included	?
Database included for all organization sizes	included	?
Document image stored with transactions	included	?
User-based security	included	?

If you find out your other option doesn't include this functionality in its base price, "**Take a Closer Look at AccuFund**", the affordable solution for nonprofit and government agencies. Sign up for a webinar with the link above, call our sales department or a reseller near you.
