

AccuFund announces the release of version 5.02 of its nonprofit and government Accounting Suites available for both online and on-premise licensing. Version 5.02 includes a new Travel Advance Management module and enhancements to the Work Order module.

Designed for organizations whose employees travel extensively, the Travel Advance Management tracks all open travel requests. It is linked to the Accounts Payable and Accounts Receivable modules of AccuFund providing clients with a total environment to manage and reconcile travel activity.

The Work Order module enhancements extend the usefulness of the module beyond its original purpose of supporting the public works departments of local government.

Other changes in version 5.02 include enhancements to year end payroll processing and additional features in the AccuFund Report Writer.
