

What's Trending: Classifications in

AccuFund

Our FREE 'What's Trending' session will focus on Classifications for AccuFund's Onsite, Hosted, & Anywhere customers.

Classifications are a cornerstone of the AccuFund General Ledger, empowering you to efficiently group similar or diverse accounts to meet a wide range of organizational needs. Whether you're preparing Financial Reports, developing Budgets, or automating complex Allocations, classifications provide the flexibility and precision essential for streamlined financial management.

During these FREE, 60 minute client trainings we will:

- Create Financial Report Rows grouping line items with subtotals,
- Filter Financial Report Columns - e.g. total government funds or total restricted funds,
- Create rows and subtotalling for Budget Worksheets, and
- Restrict or filter accounts for allocations or automations.

We will hold two sessions. Please register based on your AccuFund solution:
