

**Online vs. Onsite, A Government's Guide to Selecting Accounting Software** takes an objective look; identifying 6 Key Factors and Questions to Consider that can help you make the right decision.

- Do employees only need access while onsite or do they need to have mobile access?
- What type of training and support is available to help improve system efficiency?
- What is your internal process if your server goes down?
- Are updates included in on-premise support fees?
- How can you compare IT costs of going with a cloud solution versus recurring fees of an onsite solution?
- Can you convert to the other deployment if necessary?

Take an in-depth look at both sides of the discussion. Online vs. Onsite. One isn't better than the other – they are both valid options – it just depends on what's right for your government.
