AccuFund partners with Real Vision Software (RVI) to integrate the RVI Document Imaging System with the AccuFund Accounting Suite, providing enhanced document imaging and storage capabilities for organizations.

- Easy Retrieval - when documents are scanned or uploaded in AccuFund, they are automatically indexed in RVI,
- Save Time - no need for manual entry of code and other information related to the document, as RVI automatically captures that information from AccuFund and attaches it to the document,
- Seamless Integration - documents stored in RVI are directly linked to transactions in AccuFund and can be viewed and reported within AccuFund.
