

Smart Capture

AccuFund Anywhere Online

Put the Power of AI to Work for You

AccuFund's Smart Capture uses AI (Artificial Intelligence) to help your entity streamline and automate your invoice processing. Our bill capture technology helps your organization go paperless, stay organized, and increase efficiency.

Smart Capture allows you to automate the creation of an AP Bill directly from a scanned PDF document. Powered by AI technology, as you scan documents, Smart Capture learns the way you do business, helping you automate the bill process, and saving you time and money.

Smart Capture and AccuFund Anywhere.

Smart Capture is built within your AccuFund software. Unlike most bill automation solutions, where they send you to bill payment solutions outside of their software, AccuFund's solution is built right in, providing seamless productivity and maximized efficiency. See the outlined steps below.

- Step 1 : Receive Invoices
- Step 2 : Select Invoices
- Step 3 : Process Invoices
- Step 4 : Invoice Posted, Ready to Pay

AccuFund uses Artificial Intelligence tools to learn your payables. When needed, AccuFund gives you the opportunity to verify and “teach” the system the properties and attributes of fields on specific invoice formats.
