

Position Control

AccuFund Onsite

Take Control of Your Payroll Budget

Our Position Control module allows you to take control of your payroll budget, even create payroll encumbrances and seamlessly report on budget to actual financial statements.

The Position Control Module allows organizations to track employees by position and know which positions are open or have been filled. When an employee enters their time, that information is automatically recorded to their position, enabling the organization to know how much has been expensed to that position.

The Position Control Module helps organizations get a better handle on their employee commitments to grants and obtain specific information on the positions it has.
